Trenton Cycling Revolution is pleased to support the application by the City of Trenton for Environmental Protection Agency funding. Our organization was founded to create a safe and healthy environment for bicyclists in Greater Trenton, through education, advocacy and promotion. Trenton Cycling Revolution has been concerned with and involved in bicycle and pedestrian planning in Trenton, often working closely with the city employees and officials, for over 10 years.

We understand that the City is seeking funding from EPA for improvements in the neighborhoods adjacent to the Trenton Transit Center. As avid users of the bicycle network in our area, we know there is a pressing need for signage and infrastructure improvements. Upgrades to the bike network, and pedestrian crossings are urgently needed. Clearly marking the roads with better signage for all users, particularly visitors, could help riders better recognize and take advantage of places of interest in close proximity to the train station. Trenton Cycling Revolution supports any programs that will improve the street system in Trenton.

Over the past few years, progress has been made in the area of pedestrian improvements and bicycle advocacy in Trenton. We believe this grant will further Trenton's goal of becoming a bicycle- and pedestrian-friendly city. Trenton Cycling Revolution is committed to assisting the City of Trenton with this important project and we look forward to working on this grant with the City of Trenton.

Kind Regards,

Dan Fatton
Chair
Trenton Cycling Revolution
